How to use Poll Everywhere for CS 1112

What is Poll Everywhere?? Poll Everywhere is a simple application that works well for live audiences using mobile devices like phones. People participate by visiting a web page, using the mobile application, or sending text messages. The polls will typically be embedded into the slides for this course, but we do have a sample question that you can already start answering.

You can access Poll Everywhere a number of ways during class:
- Using the Poll Everywhere phone app
- Using your computer/tablet
- Through texting (least recommended)

You can find instructions on each of the access methods below. If you have any trouble with setting this up, contact the instructor at cs1112-prof@cornell.edu.

If you would like to use the phone app, the steps are:
1. Download the Poll Everywhere app
2. Click on the "Registration" tab at the bottom of the app
3. Fill in your Cornell email address to the Log In bar then press "Next"
4. Click "Log in with Cornell Net ID"
5. Sign in to the CUWebLogin
6. Click on the "Home" tab on the bottom of the app
7. Join presentation "PollEV.com/matlab"
8. You should see a question asking "How did you access this poll?" Answer the question then you are all set!

If you would like to use your computer/tablet to answer the questions, the steps are:
1. Go to http://www.polleverywhere.com.
2. Click "Log in" in the upper right corner. User name is [netid]@cornell.edu. Do not fill in Password. Click on Single-Sign On link and log into CUWebLogin.
3. Create your Account.
4. Complete the form, review/agree to the terms & conditions and privacy policy and click "Create my Poll Everywhere account"
5. The go to pollev.com/matlab
6. You should see a question asking "How did you access this poll?" Answer the question then you are all set!

If you would like to answer the questions through texting (you will not be bringing a laptop to class and you cannot download the mobile app), the steps are:

1. Send an email to cs1112-prof@cornell.edu titled "Poll Everywhere text message registration" and indicate what phone number you will use to answer the polls.
2. Once you get a response to that email, look at the picture at the bottom of this slide
   a. Text the number
   b. Answer the question

If you need other accommodations (you will not bring a laptop/tablet nor a mobile phone to class), email cs1112-prof@cornell.edu and the instructor will help you figure out a way to answer the Poll Everywhere questions.

🌐 Respond at **PollEv.com/matlab**
✉ Text **MATLAB** to **22333** once to join, then **A, B, or C**

How did you access this poll?

By texting the number.	**A**
On my computer.	**B**
Through the mobile app on my phone.	**C**
